NEUMAN & ESSER South East Asia LTD.

ON January 1st, 2021 NEAC Compressor Service changed to NEUMAN & ESSER South East Asia (SEA). NEA SEA has now grown into a full Sales and Application Center with over 60 employees. NEA SEA provides the full range of technical and commercial support during bidding. All project management and execution during the course of the projects is provided by a high caliber international project management team from the day of purchase until on-site commissioning. The aftermarket sales, order processing, and service teams show strength with strong local teamwork combined with decentralized employees in several countries within the sales area.

We specialist for reciprocating compressor also known as Piston Compressor can be used for all application and gases. independent of gas composition, temperature, and Molar Weight. Type of NEA reciprocating compressor onsite of V-type, Horizontal type, and Vertical type.

Dependent on the requirements, the NEA SEA service technicians repair or exchange components or provide spare parts. With this, NEA SEA also has access to numerous licenses for former reciprocating compressor product lines. NEA SEA Compressor Service is officially the only provider and original spare parts supplier for the brands
